Sitong Li

Ann Arbor, MI · 9522014026 · ruc.sitongli@gmail.com

Education

University of Minnesota, Carlson School of Management Minneapolis, MN
M.S. in Finance & Business Analytics — GPA: 3.97 / 4.00 *Jun 2023 – Aug 2025*

- Honors: Carlson Scholar (highest academic award), Merit-Based Scholarship
- GMAT Focus Edition 655 (equivalent to 710 on Classic GMAT)
- Relevant Coursework: Predictive Analytics, Causal Inference, Big Data Analytics, Financial Econometrics

Renmin University of China, School of Business Beijing, China
B.B.A. in Accounting *Sep 2019 – Jun 2023*

Professional Experience

Ross School of Business, University of Michigan Ann Arbor, MI
Data Analyst *Nov 2025 – Present*

- Designed and deployed a scalable data pipeline integrating LLMs, FuzzyWuzzy string matching, and word embeddings to link records across heterogeneous administrative datasets, ensuring data accuracy and consistency through rigorous validation
- Built an ETL workflow and computer vision pipeline to process and analyze demographic data from applicant photos, enabling structured, large-scale population analysis and supporting data-driven product decisions
- Delivered cleaned, analysis-ready datasets and automated reporting outputs, translating business requirements into actionable data solutions for cross-functional stakeholders

Research Experience

Olin School of Business, Washington University in St. Louis
Research Assistant to Prof. William Cassidy (Empirical Macro-Finance) *Nov 2024 – Nov 2025*

- Digitized 1950s-era congressional hearing transcripts from scanned PDFs into structured text using the multimodal LLM Donut, building a document processing pipeline for downstream analysis
- Applied GPT-4 to classify topics and extract fiscal policy indicators (fiscal actions, policy styles) from 100,000+ lines of congressional testimony
- Employed BERT-based entity resolution to link speaker identities to party affiliation and measure partisan sentiment in testimonies
- Scraped and merged member demographics (House/Senate), chamber majority composition, and session metadata into an analysis-ready panel
- Built an MNIR-inspired model (Gentzkow, Shapiro & Taddy, *Econometrica*, 2019) using word embeddings to quantify ideological divergence across party lines
- Computed cross-sectional dispersion in sentiment by speaker role and party affiliation across congressional sessions
- Conducted regression analyses linking macroeconomic outcomes to partisan rhetoric patterns in fiscal policy hearings

Carlson School of Management, University of Minnesota
Research Assistant to Prof. Haiwen (Helen) Zhang (Environmental Enforcement) *Mar 2025 – Aug 2025*

- Converted 10 years of scanned regulatory emails to structured text using OCR and regular expressions, creating an automated data processing workflow
- Applied GPT-4 to extract key topics and inquiry points from 100,000+ emails across 1,000+ entities
- Used generative models to identify whether inquiries targeted public firms and extracted corresponding company names
- Built a GPT-4-powered search bot integrated with the Google Search API to retrieve entity-specific contextual information
- Matched email inquiries with EPA enforcement records; ran probit regressions to examine enforcement determinants

Carlson School of Management, University of Minnesota
Research Assistant to Prof. Haiwen (Helen) Zhang (Climate Risk Disclosure) *Nov 2023 – Aug 2025*

- Built a web crawler to collect and parse 10,000+ full-text 10-K filings from SEC EDGAR, designing an ETL workflow for large-scale disclosure analysis
- Segmented filings into structured sections (Item 1A, Item 7, etc.) using regex and HTML parsing for item-level analysis
- Applied BERT and rule-based classifiers to detect and quantify climate risk disclosures across 500,000+ sentences
- Analyzed fair value disclosures in bank 10-Ks using GPT-4 applied to segmented text chunks
- Measured textual readability and systemic risk exposure using metrics from Campbell et al. (2014)
- Validated findings through panel regressions and event study models estimated in Stata

Industry Experience

China International Capital Corporation (CICC) Beijing, China
Equity Strategy Intern *Jun 2023 – Aug 2023*

- Led HK-listed stock industry reclassification using an NLP model trained on A-share descriptions, achieving 90% primary and 70% secondary classification accuracy
- Synthesized macroeconomic growth and inflation factors to guide equity investment decisions using hypothesis testing

Harvest Fund Management Co., Ltd. Beijing, China
Fixed-Income Research Intern *Dec 2022 – May 2023*

- Estimated high-frequency duration of 30,000+ fixed-income funds using Ridge, Lasso, and convex optimization
- Built an attention-based pricing model with 80 bps accuracy improvement; implemented Campisi decomposition across 30,000+ holdings

China International Capital Corporation (CICC) Beijing, China
Quantitative Research Intern *Jul 2022 – Dec 2022*

- Analyzed 3,000+ mutual funds using Sharpe ratio and Fama-French factor models with rolling estimation windows
- Applied difference-in-differences to study employee stock ownership plans and stock prices; designed strategy achieving 2% abnormal return

Harvest Fund Management Co., Ltd. Beijing, China
Quantitative Research Intern *Jan 2022 – Jul 2022*

- Estimated high-frequency positions of 300+ thematic/index funds; identified predictive raw-material price factors via XGBoost
- Designed an EV sector scoring strategy; managed underlying data via SQL-based databases

Skills

Programming: Python, SQL, R, Stata, MATLAB, C++, Java, OCaml
Tools & Platforms: Git, LaTeX, Unix/Bash, Vim, Databricks, Spark, AWS, SAS, Slurm, HTML
Languages: English (Fluent), Mandarin (Native)
