

Sitong Li

Ann Arbor, MI · 9522014026 · ruc.sitongli@gmail.com

EDUCATION

University of Minnesota, Carlson School of Management

Minneapolis, MN

M.S. in Finance & Business Analytics — GPA: 3.97 / 4.00

Jun 2023 – Aug 2025

- Honors: Carlson Scholar (highest academic award), Merit-Based Scholarship
- GMAT Focus Edition 655 (equivalent to 710 on Classic GMAT)
- Relevant Coursework: Causal Inference, Predictive Analytics, Financial Econometrics, Big Data Analytics

Renmin University of China, School of Business

Beijing, China

B.B.A. in Accounting

Sep 2019 – Jun 2023

PROFESSIONAL EXPERIENCE

Ross School of Business, University of Michigan

Ann Arbor, MI

Research Analyst

Nov 2025 – Present

- Cleaned and managed large-scale administrative datasets, building a scalable entity resolution pipeline integrating LLMs, FuzzyWuzzy string matching, and word embeddings to link student application records across heterogeneous institutional sources
- Designed a computer vision pipeline to infer demographic attributes from applicant photos, enabling structured, large-scale population analysis in support of cross-institutional equity research
- Prepared analysis-ready datasets and research outputs to support a cross-functional team of faculty at Yale, Barnard, and Michigan, meeting academic production timelines

RESEARCH EXPERIENCE

Carlson School of Management, University of Minnesota

Research Assistant to Prof. Haiwen (Helen) Zhang (Environmental Policy & Enforcement)

Mar 2025 – Aug 2025

- Cleaned and merged large administrative datasets from EPA enforcement records and regulatory correspondence; ran probit regressions to examine causal determinants of enforcement actions
- Converted 10 years of scanned regulatory emails into structured, analysis-ready text using OCR and regular expressions, managing a corpus of 100,000+ documents across 1,000+ entities
- Applied GPT-4 to extract key policy topics and inquiry points from regulatory correspondence, producing structured outputs for downstream statistical analyses
- Built a GPT-4-powered search bot integrated with the Google Search API to retrieve entity-specific contextual information
- Used generative models to identify whether inquiries targeted public firms and extracted corresponding company names

Carlson School of Management, University of Minnesota

Research Assistant to Prof. Haiwen (Helen) Zhang (Climate Risk Disclosure)

Nov 2023 – Aug 2025

- Validated findings through panel regressions and event study models estimated in Stata across 10,000+ corporate filings
- Built a web crawler to collect and parse 10,000+ full-text 10-K filings from SEC EDGAR for large-scale disclosure analysis
- Segmented filings into structured sections (Item 1A, Item 7, etc.) using regex and HTML parsing for item-level analysis
- Applied BERT and rule-based classifiers to detect and quantify climate risk disclosures across 500,000+ sentences
- Measured textual readability and systemic risk exposure using metrics from Campbell et al. (2014)
- Analyzed fair value disclosures in bank 10-Ks using GPT-4 applied to segmented text chunks

Olin School of Business, Washington University in St. Louis

Research Assistant to Prof. William Cassidy (Empirical Macro-Finance)

Nov 2024 – Nov 2025

- Conducted regression analyses linking macroeconomic outcomes to partisan rhetoric patterns documented in 70 years of fiscal policy hearings
- Scraped and merged member demographics (House/Senate), chamber majority composition, and session metadata into an analysis-ready panel dataset

- Applied GPT-4 to classify topics and extract fiscal policy indicators (fiscal actions, policy styles) from 100,000+ lines of congressional testimony
- Digitized 1950s-era congressional hearing transcripts from scanned PDFs into structured text using the multimodal LLM Donut
- Employed BERT-based entity resolution to link speaker identities to party affiliation and measure partisan sentiment in testimonies
- Built an MNIR-inspired model (Gentzkow, Shapiro & Taddy, *Econometrica*, 2019) using word embeddings to quantify ideological divergence across party lines
- Computed cross-sectional dispersion in sentiment by speaker role and party affiliation across congressional sessions

INDUSTRY EXPERIENCE

China International Capital Corporation (CICC)

Beijing, China

Equity Strategy Intern

Jun 2023 – Aug 2023

- Led HK-listed stock industry reclassification using an NLP model trained on A-share descriptions, achieving 90% primary and 70% secondary classification accuracy
- Synthesized macroeconomic growth and inflation factors to guide equity investment decisions using hypothesis testing

Harvest Fund Management Co., Ltd.

Beijing, China

Fixed-Income Research Intern

Dec 2022 – May 2023

- Estimated high-frequency duration of 30,000+ fixed-income funds using Ridge, Lasso, and convex optimization
- Built an attention-based pricing model with 80 bps accuracy improvement; implemented Campisi decomposition across 30,000+ holdings

China International Capital Corporation (CICC)

Beijing, China

Quantitative Research Intern

Jul 2022 – Dec 2022

- Applied difference-in-differences to evaluate the effect of employee stock ownership plans on stock prices; designed strategy achieving 2% abnormal return
- Analyzed 3,000+ mutual funds using Sharpe ratio and Fama-French factor models with rolling estimation windows

Harvest Fund Management Co., Ltd.

Beijing, China

Quantitative Research Intern

Jan 2022 – Jul 2022

- Estimated high-frequency positions of 300+ thematic/index funds; identified predictive raw-material price factors via XGBoost
- Designed an EV sector scoring strategy; managed underlying data via SQL-based databases

SKILLS

Programming: Stata, R, Python, SQL, MATLAB, C++, Java, OCaml

Tools & Platforms: Git, L^AT_EX, Unix/Bash, Vim, Databricks, Spark, AWS, SAS, Slurm, HTML

Languages: English (Fluent), Mandarin (Native)
